- Technical: Ruby, JavaScript, SQL, MVC, APIs, ActiveRecord, Python fundamentals
- Automation: Data validation, debugging, workflow automation, error tracing
- Tools: Git, SQLite, RSpec, Figma, Postman, Bootstrap
- Soft Skills: Rigor, structured thinking, resilience under pressure, clear communication

## CERTIFICATIONS

- CISA – IS Audit (preparation)
- AWS Cloud Practitioner (preparation)

## LANGUAGES

- French: Native
- English: Professional proficiency

## INTERESTS

Market finance, operational security, AI governance, system optimisation, sport & dogs.

## RELEVANT PROJECTS

### **Study Buddy – AI Workflow Assistant (2025)**

AI-powered automation assistant designed for decision structuring, workflow reliability, error handling and API integration.

### **Police-Tech Platform (2025)**

Citizen-to-police platform enabling uploads, secure routing and AI-driven triage with strong governance and operational safety.

### **Technical Debugging – Le Wagon**

Advanced debugging of Ruby OOP, SQL schema, migrations, validation logic and multi-layer application stability.

## EXPERIENCE

### **Tech & Process Reliability – Freelance / Projects (2021)**

Strengthened controls, fixed system errors, structured workflows and increased system reliability.

### **Operational Workflow Projects (2023–2025)**

Risk assessments, documentation structuring, regulatory interactions and workflow verification logic.

## EDUCATION

### **Le Wagon – Full-Stack Web Development Bootcamp (2025)**

Ruby, SQL, MVC, JS, APIs, debugging, Git.

### **Financial Markets & Risk Governance – Self-study (2024–2025)**

KYC/AML, operational risk, FO supervision, incident management and AMF/ACPR expectations.
